Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 5-22 and 28 and generic claims 1-4 drawn to a cash dispensing system featuring a blocking gate working in concert with an interlocking follower, classified in class 221, subclass 83.
 - II. Claims 23-27, 29-30 & generic claims 1-4 drawn to a cash dispensing system with an envelope transporting container, classified in class 221, subclass 186.
 - III. Claims 31-37 & generic claim 1 drawn to a cash dispensing apparatus featuring a controlling of a dispensing gate, classified in class 221, subclass 247.
2. Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a security gate in preventing unauthorized access to the dispensate through a dispensing outlet. See MPEP § 806.05(d). In the instant case, invention II has separate utility such as moving or conveying documents to an alternate dispensing port. See MPEP § 806.05(d). Invention III has separate utility such as remotely controlling dispensing. See MPEP § 806.05(d).
3. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the

Art Unit: 3653

inventions have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired a separate status in the art due to their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Claims 1 and 25-26 lack sufficient detail of the restricted inventions so as to constitute a generic claim and may be examined with any of groups I, II, or III. Claims 2-4 lack sufficient detail of the restricted inventions so as to constitute a generic claim and may be examined with either of groups I, or II.

5. No claims appear to be linking claims.

6. Several claims are subject to rejoinder contingent upon their dependence from an allowable base claim.

Conclusion

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Exmr. Michael E. Butler whose telephone number is (571) 272-6937.
